Full Names	Ralf Müller (Mueller)
Date of Birth	01.01.1960
Sex	male
Marital Status	single
Children	Tobias (35), Tina (34)
Language Proficiency	native: German excellent: English, IELTS-Test 2010: 7.0 traces: Spanish, Portuguese, Greek
EDP Proficiency	Medical App Developer (Android)
Nationality	Austria
Passport	Number: P 5948927, Kontrollnummer: 5 Date of Issue: 2011-10-13 Valid to: 2021-10-12
Residential Address	Rainweg 15 5102 Anthering, Salzburg, Austria
Postal Address	Rainweg 15 5102 Anthering, Salzburg, Austria
Work Address	Krankenhaus Oberndorf Paracelsusstraße 37 5110 Oberndorf, Salzburg, Austria
Telephone Numbers	Mobile: +43 660 633 70 10 Job: +43 6272 4334 539
Availability	1. Email 2. Phone
Hobbies, Interests	<ul style="list-style-type: none"> • hang gliding worldwide since 1982 • various sports, such as skiing, hiking, cycling, etc. • music (guitar) • writing books (medicine & sports) • developing medical apps

2 Educational Qualifications

2.1 Secondary Schools

American High School Diploma	Moscow Senior High School, Idaho, USA	1977
Austrian High School Diploma (Reifezeugnis, Matura)	Bundesrealgymnasium 8580 Köflach, Austria	1978

2.2 Tertiary Qualifications

Medical Doctor (Doctor Medicinae Universae)	University of Graz (Karl- Franzens-Universität Graz), AT	1990
Emergency Diploma (Notarzt- Diplom)	Austrian Medical Chamber (Österreichische Ärztekammer)	1991
Chief Emergency Diploma (Leitender Notarzt, LNA)	Austrian Medical Chamber (Österreichische Ärztekammer)	1996
Specialist for Anaesthesiology & Intensive Care Medicine	Austrian Medical Chamber (Österreichische Ärztekammer)	1997
Diploma of Continuing Education (Fortbildungsdiplom der ÖÄK)	Austrian Medical Chamber (Österreichische Ärztekammer)	2012- 2022

3 Work Experience

3.1 Present Employment

Company	Hospital Oberndorf (Krankenhaus Oberndorf), Salzburg, AT
Head of Clinic	Christian Datz , Medizinalrat, Primarius Univ. Professor, MD
Head of Dep. Anaesthesiology and ICU	Martin Raffl , Primarius, MD
Head of Dep. Orthopaedic surgery	Thomas Ramsauer , Primarius, MD
Head of Dep. General Surgery and Abdominal Surgery	Andreas Heuberger , Primarius, MD
Employment Dates	Since 01.04.2017
Position held	senior physician, specialist for anaesthesiology and intensive care medicine (Oberarzt, Facharzt für Anästhesiologie und Intensivmedizin)
Internet	www.krankenhaus-oberndorf.at
Description of Unit	<p>This clinic is run by the City of Oberndorf and the Company Vamed. Therefore, you find all the advantages of a private and public clinic within one house: Excellent physicians with excellent equipment as well as 24-hour-ambulances for acute treatment of emergency cases.</p> <p>There are 2 departments in the surgical sector: general surgery (focus on laparoscopic abdominal operations) and orthopaedics (focus on knee- and hip prostheses as well as shoulder-operations).</p> <p>Working in the Department for Anaesthesiology and Intensive Care you find big variety of challenges: In the operation rooms we do all kinds of anaesthesia including regional anaesthesia (ultrasound guided nerve-blocks, pain-catheters, SPAs, PDAs) as well as general anaesthesia (balanced anaesthesia, TIVA).</p> <p>The Intensive Care Unit (ICU) does not only treat peri-operative and traumatological patients, but also a big variety of patients of the internal medical fields, such as ARDS, ARF, metabolic disorders or massive SIRS and MODS (for example in context with Fournier necrosis). Our intensive care specialists are well trained in the use of all kinds of equipment, such as hemodynamic, hemofiltration, ventilation and ultrasound guided central venous catheterization.</p> <p>The Intermediate Care Unit (IMCU) is mainly used as a recovery room for postoperative and post-endoscopic patients.</p>
Clinic Size	More than 2.700 narcosis a year, 1 Intensive Care Unit (ICU), 1 Intermediate Care Unit (IMCU), ambulances run 24-hours a day, 100 beds (orthopaedic, general surgery, internal medicine).
Shifts	Part-time 80%, which is about 3 nightshifts per month average and 40 hours of work a week average;

3.2 Experiences

<p>Responsibilities and Duties</p>	<p>I'm "specialised in general anaesthesia" – in other words: there is very little anaesthesia left, I cannot handle. For the past decades my main job has been anaesthesia for various operations, such as: large abdominal-, endocrine-, trauma-, orthopaedic-, urologic-, dermatologic, plastic surgery. Further I do endoscopic and radiologic diagnosis and therapies, as far as anaesthesia is needed. There is no favourite anaesthesiologic pathway, I like to do regional anaesthesia by nerve stimulation as well as ultrasound guided and general anaesthesia. For 25 years I did obstetric and gynaecological anaesthesiologic treatment, for example obstetric PDA's, median and paramedian technic included.</p> <p>For the first 20 years of my career, the main field of work besides anaesthesia has been: Preclinical emergency medicine, leading an emergency ambulance base for about 15 years (Medical Chief of Emergency Base Voitsberg, AT). We did handle all kinds of internal as well as traumatological emergency cases.</p> <p>Having done quite some courses and practise concerning disaster medicine my employers gave me jobs like disaster managing & training. Lately I have been chief of the triage unit during the COVID-19 crisis in Oberndorf/Salzburg/Austria.</p> <p>My intensive care experiences have been trained in various ICU's. There are very nice memories to the ICU for internal medicine at Medical University of Graz.</p>
<p>Types of patients serviced</p>	<p>Patients who need elective or acute surgical intervention, vitally threatened patients in the ambulance, emergency room and ICU. Also, most of my patients are adult I do handle a lot of paediatric cases.</p>
<p>Procedures and treatment performed</p>	<p>I like to do general anaesthesia (balanced and TIVA) as well as regional anaesthesia, including SPA, PDA (median and paramedian, lumbar and thoracic) and all widely used nerve blocks.</p> <p>Having done about 2000 preclinical emergency missions I'm used to all kinds of emergency medicine treatments, traumatological as well as internal cases. Working in a large European medical centre (Graz) I got used to emergency room workflows. Further I'm familiar with most of the intensive care procedures.</p>
<p>Equipment:</p>	<p>There is very little equipment left, which I'm not familiar with. Nevertheless, I'm always looking forward to filling up missing links and keep up with my young colleges.</p>

4 Employment History

Company	Position Held	Description of Unit	Year
Austrian Mountain Patrol	voluntary alpine paramedic & doc	alpine rescue team	1976-2006
University of Graz	supervisor	Department of Histology	1985-1988
Austrian Red Cross	paramedic	rescue team, civil service	1990
General Hospital, Landeskrankenhaus Voitsberg	- resident - intern - emergency doctor	Dep. of Anaesthesiology Intensive Care and Emergency Medicine	1991-1997
Medical University of Graz, Department of Internal Medicine	- intern, specialising in intensive care medicine	20 ICU beds for internal intensive care medicine	1995
